London Sexual Health Programme (CCard registration)

TAMonitor & Lithium

Closing the information loop

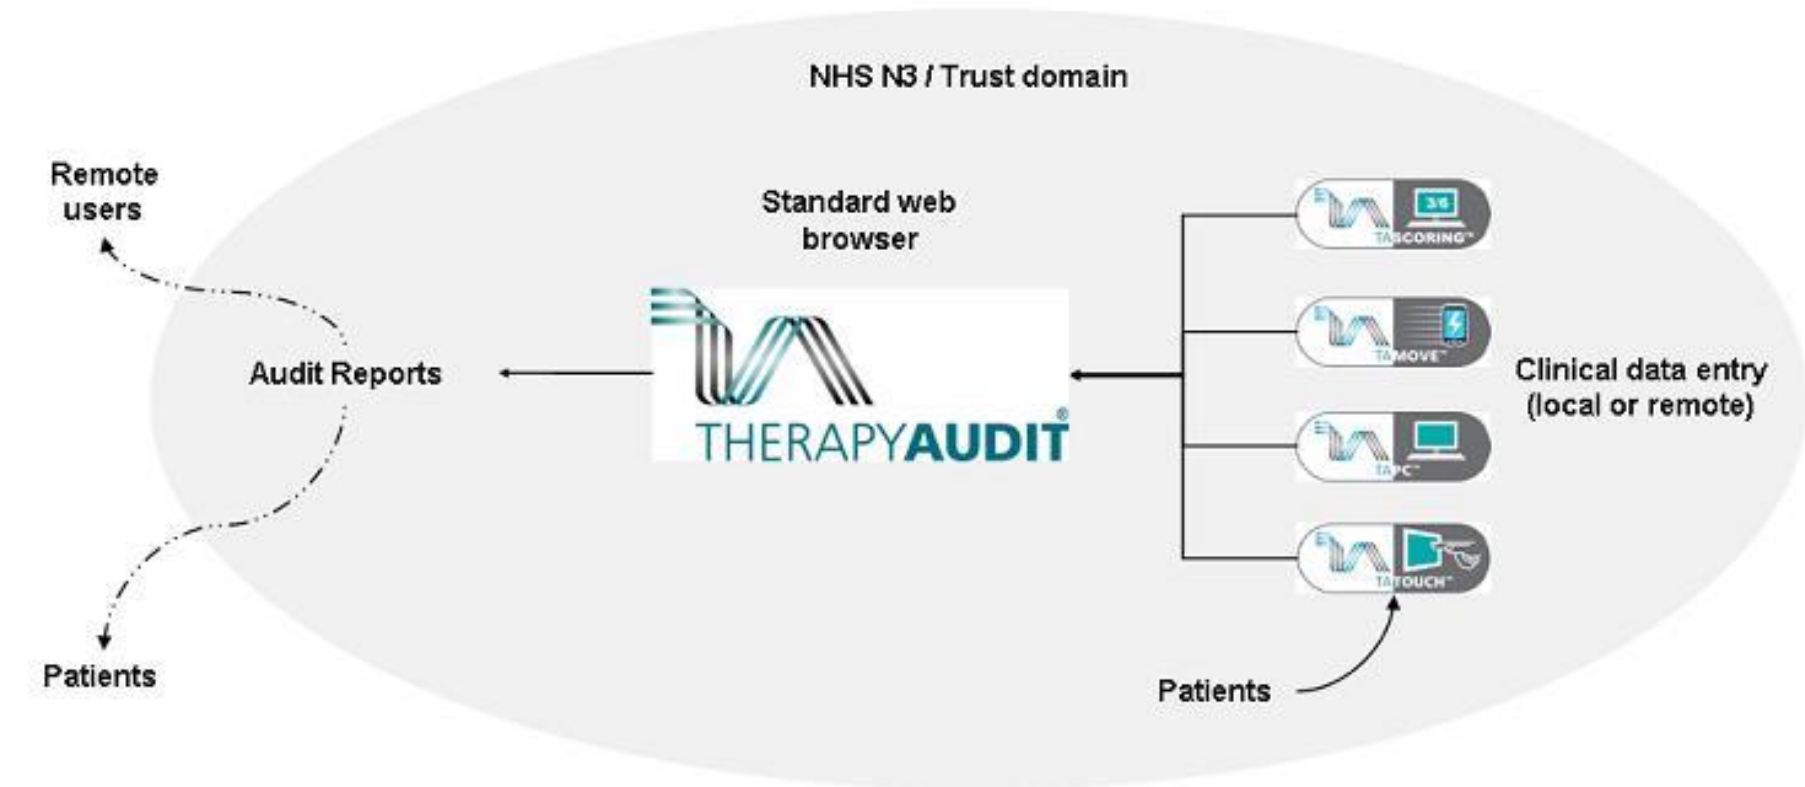

NPSA Lithium Alert

“Lithium monitoring and checking of key blood tests have been implicated in NHS litigations and patient deaths.”

Requirement	TAMonitor
“there are reliable systems in place to make sure that the results of blood tests are communicated between laboratories and prescribers”	Proven experience in and capability to collect blood results and communicate them to prescribers
“at the start of lithium therapy, and throughout their treatment, patients receive appropriate ongoing verbal and written information and a record book to track lithium blood levels and relevant clinical tests”	Web-based product which could provide for online ordering of relevant booklets and information for patients and staff
“prescribers and pharmacists check that blood tests are being monitored regularly and that it is safe to issue a repeat prescription or dispense the prescribed lithium”	Sophisticated rules-based identification of DNAs for blood testing
“systems are in place to identify and deal with medicines that might adversely interact with lithium therapy”	Links to contra-indication systems
